

# BRIDGING THE GAP THROUGH EDTECH

## OUR PRODUCT- UNI

UNI is an affordable, portable hotspot that provides offline access to essential educational resources such as Wikipedia or SCRATCH in "grey" zones where access to the internet or electricity is unreliable. UNI can work without access to the internet and comes pre-loaded with **educational content that can be customized for each deployment.**

## WHO IS GREY-BOX?

Grey-box is a social innovation startup registered in Canada that aims to bridge the global digital divide. Through equal access to digital tools and resources, we can provide an accessible education for everyone, no matter their location.

### ACCESSIBLE

Lighter than the average phone  
Pre-loaded educational content  
100 metre connection range

### LOW POWER

Low power usage  
Cellphone charger, portable battery  
& solar power friendly

### ROBUST

Dust and heat resistant  
Built for extreme environments  
Compatible with local devices

### AFFORDABLE

Subsidized editions available at  
less than \$100 per unit  
Connect up to 10 devices

## Our project got peer recognition with:

[Future of Good's Founders To Watch](#) | [National media coverage on CBC](#) | [Liens Multimedia](#) | [Hinnovic](#)

## We're Deployed In:

[Mexico](#) | [Canada](#) | [Madagascar](#) | [Cameroon](#) | [Congo](#) | [Somalia](#) | [South Sudan](#)

## PILOT PROJECT

Education is a key driver in reducing poverty, fostering economic growth, and social development. However, many young students around the globe do not have access to a quality and advanced education - especially in STEM programs.

Through a pilot project with **Grey-Box**, we can accelerate access to these educational tools on the ground by minimizing deployment time and reducing technology friction. UNI is currently in Beta phase and is looking to validate its solution in the field.
